

# E-0001- Hopper Funnel Installation instructions

1 – Mark the centerline of the support plate

2 – Using the « Danger » imprint on the hopper as reference, mark the center line.

3 – Temporarily assemble the funnel support brackets without the top plate.

4 – Place the bracket assembly on the hopper. Align the support plate and hopper centerlines. Use the seam of the hopper to align the top of the brackets

5 – Mark and drill the 2 top holes.

6 – Using 2 of the bolts on the assembly and the newly drill holes, install it to the hopper.

# E-0001- Hopper Funnel Installation instructions

6 – Using 2 of the bolts on the assembly and the newly drill holes, install it to the hopper.

7 – Using the holes in the brackets as guides, drill the hopper.

8 – Remove the bracket assembly, and install the support plate on the inside of the hopper. Note that flat washer should be used on the 2 top bolts.

9 – Drill the remaining holes

10 – Install the remaining bolts in the brackets and the top plate.
